

Belt Driven Actuator **IFA**

IAI INTELLIGENT ACTUATOR

 Battery-less Absolute Encoder
No Battery,
No Maintenance, No Homing,
No Going Back to Incremental.

Ideal for long-distance transport between processes

High-speed Belt Driven Actuator

IFA

Long stroke

Low price

High payload

High-speed

Battery-less absolute encoder mounted

Easy maintenance

Simple dustproof

Max. payload
40kg

Max. 3200mm
Max. speed: 3000mm/s

Model	Stroke	Payload (horizontal)	Speed	Acceleration/ deceleration
IFA-SA□	2600mm	20kg	2000mm/s	2.0G
IFA-MA□	3200mm	40kg	3000mm/s	2.0G

*Max. value for each item

- Supports simple dustproofing with stainless steel sheet specification

- Double slider specification available

Example Loader/unloader for machines

Example Transport to circuit board inspection process

- Slider belt/drive belt tension adjustment is easy

Tension can be adjusted by twisting the bolts

- Regreasing and stainless steel sheet/belt replacement are possible without removing the mounting parts on the slider

Product Lineup

Type	Motor mounting direction	Body width *1	Motor output (W)	Lead (mm)	Positioning repeatability (mm)	Stroke (mm) *2	Max. speed (mm/s)	Horizontal max. payload (kg)	Specifications/drawings

*2 IFA-MA□ type only.

Type Description

The motor position can be selected from six types, as shown in the figure below. For horizontal motor and downward facing motor, the motor position is lower than the slider, with no concern about interference with workpieces.

<p>Upward facing motor</p> <p>SA1L/MA1L</p> 	<p>Horizontal motor</p> <p>SA2L/MA2L</p> 	<p>Downward facing motor</p> <p>SA3L/MA3L</p>

Mounting Orientation

○: Can be mounted —: Cannot be mounted

		Mounting orientation			
					
Series	Type	Horizontal mounting on flat surface	Horizontal mounting to side	Horizontal mounting suspended	Vertical mount
IFA	SA□	○	○ ^(*1) ○ ^(*2)	○ ^(*1) ○ ^(*2)	—
	MA□	○	○ ^(*1) ○ ^(*2)	○ ^(*1) ○ ^(*2)	—

- (*1) Installing the product horizontal to side or horizontal suspended may cause slack or misalignment in the stainless steel sheet. Continuing to use it this way could cause the stainless steel sheet to break. Please inspect it daily and adjust the sheet if any slack or misalignment is found.
- (*2) Be sure to select the "Ceiling/side mounted specifications (CSM)" option. Product with this option selected can also be mounted horizontally on flat surfaces.

Precautions for Installation

- Keep the body installation surface and workpiece mounting surface flatness within 0.05mm/m. Uneven flatness will increase the sliding resistance of the slider and may cause a malfunction.
- The body bottom base mounting surface and left side (viewed from the motor opposite side) are the reference surfaces for slider running accuracy. When running accuracy is required, mount with these surfaces as reference.
- Basically, use all through holes and secure all surfaces.

When mounting using the side reference surface, modify the installation surface as in the figure below.

Overhang Load Length

This is the approximate offset at which the actuator can operate smoothly even when the workpiece or bracket is offset from the slider. Vibration or other factors could cause failure if the approximate length is greatly exceeded. The product should therefore be used within the approximate length.

● Body mounting

This actuator has mounting through holes on the top surface.

When using M8 bolts with the IFA-MA□ type, use the included dedicated washers for high-strength bolts in order to protect the base.

Type	Dimensions (mm)		Mounting hole diameter (mm)	Reamed hole
	A	B		
SA□	83	36	ø7 through, ø12 deep counterbored, depth 12	ø6H7 depth 6
MA□	109	48	ø9 through, ø16 deep counterbored, depth 12	ø8H7 depth 6

● Transported object mounting

Using the screw holes on the slider upper surface, mount the transported object.

Type	Dimensions (mm)			Reamed hole	Mounting hole	
	A	B	C		Hole diameter (mm)	Number
SA1L/SA2L/SA3L	90	70	-	ø6H7 depth 10	M6 depth 15	4
SA1R/SA2R/SA3R					M6 depth 20	4
MA1L/MA2L/MA3L	120	-	70	ø8H7 depth 10	M6 depth 20	4
MA1R/MA2R/MA3R		90	-		M8 depth 20	4

<Caution>

For upward facing motor specifications (IFA-SA1□/MA1□), the motor part (motor cover) protrudes from the slider upper surface.

Be careful not to let the transported object interfere with the motor cover.

[Motor cover distance from slider center at mechanical end: A]

Type	A (mm)
SA1L/SA1R	96
MA1L/MA1R	124

● Connector box mounting and T-slot

There are M4 T-slots on the base surface for mounting the connector box, guide rails, etc. required for combination. Use as needed for sensor mounting, wiring fixing, etc.

Square nuts are recommended for use with the T-slots, but ordinary hex nuts can also be used.

When mounting, be careful with the bolt length so that the bolt tip does not touch the T-slot bottom.

POINT Selection Notes

- (1) Pay close attention to the mounting orientation. Please refer to P. 5 for details.
- (2) "Main Specifications" displays the payload's maximum value. Please refer to "Table of Payload by Speed/Acceleration" for more details.
- (3) Push-motion operation cannot be performed.
- (4) Estimated allowable duty ratio varies depending on load factor. Refer to P. 27 for details.
- (5) The center mass location of the attached object should be less than 1/2 of the overhang distance. Operating conditions should be moderated if abnormal vibration or noise is observed, even if the overhang distance and load moment are within allowable values.
- (6) Reference value of the overhang load length is under 450mm in the Ma, Mb, and Mc directions (for double slider specification, the actual slider span is min. [60mm]: 1200mm, max. [90mm]: 1350mm or below). Please refer to the explanation on P. 5 for the overhang load length.
- (7) When selecting the double slide specification, please refer to P. 26 for models to be ordered and precautions.

Cable Length

Type	Cable Code
Standard	S (3m)
	M (5m)
Specified length	X06(6m) ~ X10 (10m)
	X11 (11m) ~ X15 (15m)
	X16 (16m) ~ X20 (20m)
	X21 (21m) ~ X25 (25m)
	X26 (26m) ~ X30 (30m)

(Note) This is a robot cable.

Options * Please check the options reference pages to confirm each option.

Name	Model	Reference page
Cable exit direction opposite side	A6	25
AQ seal (equipped as standard) (Note 1)	AQ	25
Ceiling/side mounting specifications (Note 2)	CSM	25
Home limit switch	L	25
Home limit switch opposite side	LL	25
Non-motor end specification	NM	25
Double slider specification (Note 3)	W	25
Round cable joint connector with screw locking	EU	25

(Note 1) Be sure to fill in the option field in the model specification items.
 (Note 2) Also usable in horizontal mounting.
 (Note 3) When selecting the double slider specification (W), the payload, dimensions, and unit weight differ. Please refer to P. 8 and P. 12 for details.

Main Specifications

Item		Description	
Stroke		200 ~ 1450	1500 ~ 2600
Lead	Lead (mm)	28 or equivalent	28 or equivalent

Brake	Brake specification	— —	
	Brake holding force (kgf)	— —	
Stroke	Min. stroke (mm)	200 1500	
	Max. stroke (mm)	1450 2600	
	Stroke pitch (mm)	50 50	

(*1) When selecting the double slider specification (W), the max. payload is reduced. Please refer to the table below for more information.

Item	Description
Drive system	Timing belt, lead 28mm equivalent
Positioning repeatability	±0.04mm
Lost motion	0.1mm or less
Base	Material: Aluminum, white alumite treatment
Linear guide	Linear motion infinite circulating type
Static allowable moment (single slider specification)	Ma: 109N·m
	Mb: 156N·m
	Mc: 255N·m
Static allowable moment (double slider specification) (*2)	Ma: 744N·m
	Mb: 1060N·m
	Mc: 510N·m
Dynamic allowable moment (single slider specification) (*3)	Ma: 32.9N·m
	Mb: 47.0N·m
	Mc: 76.8N·m
Dynamic allowable moment (double slider specification) (*3)	Ma: Actual slider span min. [60mm] 182N·m, max. [90mm] 228N·m
	Mb: Actual slider span min. [60mm] 260N·m, max. [90mm] 325N·m
	Mc: Actual slider span min. [60mm] 125N·m, max. [90mm] 125N·m
Ambient operating temperature, humidity	0 ~ 40°C, 85% RH or less (Non-condensing)
Ingress protection	IP20
Vibration/shock resistance	4.9m/s ²
Compliant standards	CE marking, RoHS directive
Motor type	AC servo motor
Encoder type	Battery-less absolute
Number of encoder pulses	16384 pulse/rev

(*2) The figures are uniform regardless of slider span.

(*3) Based on the standard rated operation life of 10000km. Operation life varies according to operating and mounting conditions. Contact IAI to check the operation life.

Slider Type Moment Direction

Table of Payload by Speed/Acceleration

The unit for payload is kg.

Lead (mm)	Max. speed (mm/s)	Stroke (mm)	Horizontal Acceleration (G)																	
			0.3	0.4	0.5	0.6	0.7	0.8	0.9	1.0	1.1	1.2	1.3	1.4	1.5	1.6	1.7	1.8	1.9	2.0
28	2000	200 ~ 1450	20	15.5	12.5	10	8.5	7.5	6.5	5.5	4.7	4.3	3.9	3.5	3.2	3	2.7	2.4	2.2	2
		1500 ~ 2600	15	15	12.5	10	8.5	7.5	6.5	5.5	4.7	4.3	3.9	3.5	3.2	3	2.7	2.4	2.2	2

(Note) The specs are the same even with different controller power supply voltages.

Table of Payload by Speed/Acceleration (double slider specification)

The unit for payload is kg. If blank, operation is not possible.

Lead (mm)	Max. speed (mm/s)	Nominal stroke (mm)	Horizontal Acceleration (G)																	
			0.3	0.4	0.5	0.6	0.7	0.8	0.9	1.0	1.1	1.2	1.3	1.4	1.5	1.6	1.7	1.8	1.9	2.0
28	2000	350 ~ 1450	18	13.5	10.5	8	6.5	5.5	4.5	3.5	2.7	2.3	1.9	1.5	1.2	1	0.7	0.4	0.2	
		1500 ~ 2600	13	13	10.5	8	6.5	5.5	4.5	3.5	2.7	2.3	1.9	1.5	1.2	1	0.7	0.4	0.2	

(Note) Nominal stroke is the stroke listed in the model name, not the actually operable stroke (effective stroke).

(Note) The specs are the same even with different controller power supply voltages.

Stroke and Max. Speed

200 ~ 2600 (every 50mm)
2000

(Unit: mm/s)

IFA-SA3 (downward facing motor)

(Note) Connect the motor cable and encoder cable to the cable joint connector. Please refer to P. 30 for cable details.
 (Note) When the slider is returning to its home position, be careful of interference from surrounding objects, as it will travel until it reaches the M.E.
 (Note) Be aware that the product must be returned to IAI in order to change the home direction.
 (Note) The figure below shows SA3L.

MA2R	Horizontal motor opposite side											
MA3R	Downward facing motor opposite side											

(Note) Photo above shows upward facing motor specification (MA1L).

POINT
Selection Notes

- (1) Pay close attention to the mounting orientation. Please refer to P. 5 for details.
- (2) "Main Specifications" displays the payload's maximum value. Please refer to "Table of Payload by Speed/Acceleration" for more details.
- (3) Push-motion operation cannot be performed.
- (4) Estimated allowable duty ratio varies depending on load factor. Refer to P. 27 for details.
- (5) The center mass location of the attached object should be less than 1/2 of the overhang distance. Operating conditions should be moderated if abnormal vibration or noise is observed, even if the overhang distance and load moment are within allowable values.
- (6) Reference value of the overhang load length is under 600mm in the Ma, Mb, and Mc directions (for double slider specification, the actual slider span is min. [80mm]: 1600mm, max. [120mm]: 1800mm or below). Please refer to the explanation on P. 5 for the overhang load length.
- (7) When selecting the double slide specification, please refer to P. 26 for models to be ordered and precautions.

Cable Length	
Type	Cable Code
Standard	S (3m)
	M (5m)
Specified length	X06(6m) ~ X10 (10m)
	X11 (11m) ~ X15 (15m)
	X16 (16m) ~ X20 (20m)
	X21 (21m) ~ X25 (25m)
	X26(26m) ~ X30 (30m)

(Note) This is a robot cable.

Options * Please check the options reference pages to confirm each option.		
Name	Model	Reference page
Cable exit direction opposite side	A6	25
AQ seal (equipped as standard) (Note 1)	AQ	25
Ceiling/side mounting specifications (Note 2)	CSM	25
Hanging brackets (Note 3)	EB	25
Home limit switch (Note 3)	L	25
Home limit switch opposite side (Note 3)	LL	25
Non-motor end specification	NM	25
Double slider specification (Note 4)	W	25
Round cable joint connector with screw locking	EU	25

- (Note 1) Be sure to fill in the option field in the model specification items.
 (Note 2) Also usable in horizontal mounting.
 (Note 3) Due to mutual interference, the hanging brackets (EB) and home limit switch (L/LL) cannot be used together.
 (Note 4) When selecting the double slider specification (W), the payload, dimensions, and unit weight differ. Please refer to P. 14 and P. 18 for details.

Main Specifications

		Item	Description
Lead		Lead (mm)	42 or equivalent
Horizontal	Payload	Max. payload (kg) [Controller power supply voltage 230VAC] (*1)	25
		Max. payload (kg) [Controller power supply voltage 115VAC] (*1)	17
	Speed / acceleration/ deceleration	Max. speed (mm/s)	3000
		Min. speed (mm/s)	2.57
		Rated acceleration/deceleration (G)	0.3
Vertical	Payload	Max. acceleration/deceleration (G)	2.0
		Max. payload (kg)	—
	Speed / acceleration/ deceleration	Max. speed (mm/s)	—
		Min. speed (mm/s)	—
		Rated acceleration/deceleration (G)	—
Thrust		Max. acceleration/deceleration (G)	—
Brake		Rated thrust (N)	71.2
		Brake specification	—
Stroke		Brake holding force (kgf)	—
		Min. stroke (mm)	200
		Max. stroke (mm)	3200
		Stroke pitch (mm)	50

(*1) When selecting the double slider specification (W), the max. payload is reduced. Please refer to the table below for more information.

Item	Description
Drive system	Timing belt, lead 42mm equivalent
Positioning repeatability	±0.04mm
Lost motion	0.1mm or less
Base	Material: Aluminum, white alumite treatment
Linear guide	Linear motion infinite circulating type
Static allowable moment (single slider specification)	Ma: 259N-m
	Mb: 369N-m
	Mc: 604N-m
Static allowable moment (double slider specification) (*2)	Ma: 1760N-m
	Mb: 2520N-m
	Mc: 1210N-m
Dynamic allowable moment (single slider specification) (*3)	Ma: 81.0N-m
	Mb: 116N-m
	Mc: 189N-m
Dynamic allowable moment (double slider specification) (*3)	Ma: Actual slider span min. [80mm] 448N-m, max. [120mm] 561N-m
	Mb: Actual slider span min. [80mm] 640N-m, max. [120mm] 801N-m
	Mc: Actual slider span min. [80mm] 307N-m, max. [120mm] 307N-m
Ambient operating temperature, humidity	0 ~ 40°C, 85% RH or less (Non-condensing)
Ingress protection	IP20
Vibration/shock resistance	4.9m/s ²
Compliant standards	CE marking, RoHS directive
Motor type	AC servo motor
Encoder type	Battery-less absolute
Number of encoder pulses	16384 pulse/rev

(*2) The figures are uniform regardless of slider span.

(*3) Based on the standard rated operation life of 10000km. Operation life varies according to operating and mounting conditions. Contact IAI to check the operation life.

Slider Type Moment Direction

Table of Payload by Speed/Acceleration

The unit for payload is kg.

Lead (mm)	Max. speed (mm/s)	Orientation Controller power supply voltage	Horizontal Acceleration (G)																	
			0.3	0.4	0.5	0.6	0.7	0.8	0.9	1.0	1.1	1.2	1.3	1.4	1.5	1.6	1.7	1.8	1.9	2.0

IFA-MA1 (upward facing motor)

(Note) Connect the motor cable and encoder cable to the cable joint connector. Please refer to P. 30 for cable details.
 (Note) When the slider is returning to its home position, be careful of interference from surrounding objects, as it will travel until it reaches the M.E.
 (Note) Be aware that the product must be returned to IA1 in order to change the home direction.
 (Note) The figure below shows MA1L.

IFA-MA3 (downward facing motor)

(Note) Connect the motor cable and encoder cable to the cable joint connector. Please refer to P. 30 for cable details.
 (Note) When the slider is returning to its home position, be careful of interference from surrounding objects, as it will travel until it reaches the M.E.
 (Note) Be aware that the product must be returned to IAI in order to change the home direction.
 (Note) The figure below shows MA3L.

Dimension for double slider specification

(Note) Connect the motor cable and encoder cable to the cable joint connector. Please refer to P. 30 for cable details.
 (Note) When the slider is returning to its home position, be careful of interference from surrounding objects, as it will travel until it reaches the M.E.
 (Note) Be aware that the product must be returned to IA1 in order to change the home direction.
 (Note) The figure below shows MA1L.
 (Note) The figure below shows dimensions at minimum actual slider span.

CAD drawings can be downloaded from our website.

POINT Selection Notes

- (1) Pay close attention to the mounting orientation. Please refer to P. 5 for details.
- (2) "Main Specifications" displays the payload's maximum value. Please refer to "Table of Payload by Speed/Acceleration" for more details.
- (3) Push-motion operation cannot be performed.
- (4) Estimated allowable duty ratio varies depending on load factor. Refer to P. 27 for details.
- (5) The center mass location of the attached object should be less than 1/2 of the overhang distance. Operating conditions should be moderated if abnormal vibration or noise is observed, even if the overhang distance and load moment are within allowable values.
- (6) Reference value of the overhang load length is under 600mm in the Ma, Mb, and Mc directions (for double slider specification, the actual slider span is min. [80mm]: 1600mm, max. [120mm]: 1800mm or below). Please refer to the explanation on P. 5 for the overhang load length.
- (7) When selecting the double slide specification, please refer to P. 26 for models to be ordered and precautions.

Cable Length

Type	Cable Code
Standard	S (3m)
	M (5m)
Specified length	X06(6m) ~ X10 (10m)
	X11 (11m) ~ X15 (15m)
	X16 (16m) ~ X20 (20m)
	X21 (21m) ~ X25 (25m)
	X26(26m) ~ X30 (30m)

(Note) This is a robot cable.

Options * Please check the options reference pages to confirm each option.

Name	Model	Reference page
Cable exit direction opposite side	A6	25
AQ seal (equipped as standard) (Note 1)	AQ	25
Ceiling/side mounting specifications (Note 2)	CSM	25
Hanging brackets (Note 3)	EB	25
Home limit switch (Note 3)	L	25
Home limit switch opposite side (Note 3)	LL	25
Non-motor end specification	NM	25
Double slider specification (Note 4)	W	25
Round cable joint connector with screw locking	EU	25

- (Note 1) Be sure to fill in the option field in the model specification items.
 (Note 2) Also usable in horizontal mounting.
 (Note 3) Due to mutual interference, the hanging brackets (EB) and home limit switch (L/LL) cannot be used together.
 (Note 4) When selecting the double slider specification (W), the payload, dimensions, and unit weight differ. Please refer to P. 20 and P. 24 for details.

Main Specifications

Item		Description
Lead	Lead (mm)	42 or equivalent
Horizontal	Payload	Max. payload (kg) (*1)
	Speed / acceleration/ deceleration	Max. speed (mm/s)
		Min. speed (mm/s)
		Rated acceleration/deceleration (G)
		Max. acceleration/deceleration (G)
Vertical	Payload	—
	Speed / acceleration/ deceleration	Max. speed (mm/s)
		Min. speed (mm/s)
		Rated acceleration/deceleration (G)
		Max. acceleration/deceleration (G)
Thrust	Rated thrust (N)	142.4
Brake	Brake specification	—
	Brake holding force (kgf)	—
Stroke	Min. stroke (mm)	200
	Max. stroke (mm)	3200
	Stroke pitch (mm)	50

(*1) When selecting the double slider specification (W), the max. payload is reduced. Please refer to the table below for more information.

Item	Description
Drive system	Timing belt, lead 42mm equivalent
Positioning repeatability	±0.04mm
Lost motion	0.1mm or less
Base	Material: Aluminum, white alumite treatment
Linear guide	Linear motion infinite circulating type
Static allowable moment (single slider specification)	Ma: 259N-m
	Mb: 369N-m
	Mc: 604N-m
Static allowable moment (double slider specification) (*2)	Ma: 1760N-m
	Mb: 2520N-m
	Mc: 1210N-m
Dynamic allowable moment (single slider specification) (*3)	Ma: 81.0N-m
	Mb: 116N-m
	Mc: 189N-m
Dynamic allowable moment (double slider specification) (*3)	Ma: Actual slider span min. [80mm] 448N-m, max. [120mm] 561N-m
	Mb: Actual slider span min. [80mm] 640N-m, max. [120mm] 801N-m
	Mc: Actual slider span min. [80mm] 307N-m, max. [120mm] 307N-m
Ambient operating temperature, humidity	0 ~ 40°C, 85% RH or less (Non-condensing)
Ingress protection	IP20
Vibration/shock resistance	4.9m/s ²
Compliant standards	CE marking, RoHS directive
Motor type	AC servo motor
Encoder type	Battery-less absolute
Number of encoder pulses	16384 pulse/rev

(*2) The figures are uniform regardless of slider span.

(*3) Based on the standard rated operation life of 10000km. Operation life varies according to operating and mounting conditions. Contact IAI to check the operation life.

Slider Type Moment Direction

Table of Payload by Speed/Acceleration

The unit for payload is kg.

Orientation		Horizontal Acceleration (G)																	
Lead (mm)	Max. speed (mm/s)	0.3	0.4	0.5	0.6	0.7	0.8	0.9	1.0	1.1	1.2	1.3	1.4	1.5	1.6	1.7	1.8	1.9	2.0
42	3000	40	30	23	19	16	13	12	10	9	8	7	6.3	5.6	5	4.6	4.2	3.8	3.5

(Note) The specs are the same even with different controller power supply voltages.

Table of Payload by Speed/Acceleration (double slider specification)

The unit for payload is kg. If blank, operation is not possible.

Orientation		Horizontal Acceleration (G)																	
Lead (mm)	Max. speed (mm/s)	0.3	0.4	0.5	0.6	0.7	0.8	0.9	1.0	1.1	1.2	1.3	1.4	1.5	1.6	1.7	1.8	1.9	2.0
42	3000	36.5	26.5	19.5	15.5	12.5	9.5	8.5	6.5	5.5	4.5	3.5	2.8	2.1	1.5	1.1	0.7	0.3	

(Note) The specs are the same even with different controller power supply voltages.

Stroke and Max. Speed

200 ~ 3200 (every 50mm)
3000

(Unit: mm/s)

Options

Cable exit direction opposite side

Model **A6**

Description This option switches the actuator cable exit direction to the opposite side.

Type	SA1L/MA1L	SA2L/MA2L	SA3L/MA3L	SA1R/MA1R	SA2R/MA2R	SA3R/MA3R
Standard						
A6						

AQ seal

Model **AQ** (equipped as standard)

Description This option is a lubricating unit which supplies large quantities of lubricating oil from a multiporous substance. Contact among the steel balls in the guide provides a continuous supply of lubricating oil, enabling long-term maintenance-free use thanks to the interaction with grease.

Ceiling/side mounting specifications

Model **CSM**

Description Be sure to select this option when using ceiling and side installation. During operation, a sound like the stainless steel sheet being struck may be audible. This is caused by the vibration of the belt during slider acceleration/deceleration, when the belt and stainless steel sheet make contact. It is not a functional issue, but should it become a problem, readjust the slider belt/drive belt tension or decrease the acceleration/deceleration speed in use.

Hanging fixture

Model **EB**

Description Eyebolts, mounting brackets, hex bolts, and hex nuts are included for suspending the actuator during installation. The coupling nuts used to fix the mounting bracket are shipped embedded in the T-slots on the body sides. *Please refer to the instruction manual for details.

Home limit switch

Model **L** (standard) **LL** (opposite side)

Description Normal home return motion uses the "push method" in which the slider is pushed against the mechanical end stopper and then returns, detecting the Z-phase as home. This option triggers the return motion with a proximity sensor. When specifying this option, three proximity sensors are mounted (HOME: home detection, +OT: non-motor side overtravel, and -OT: motor side overtravel). (HOME and -OT are integrated twin sensors.) Use for fine adjustment of the return position or to enhance dependability. (Note that if the home sensor is significantly moved, the stroke may be shortened.) The home limit switch and cover mounting positions are on the right side of the actuator body (viewed from the motor side) as standard (model: L). To install the sensors on the opposite side, select LL (mounting position opposite side).

Non-motor end specification

Model **NM**

Description The home position is normally set to the motor side. This option is for setting the home position on the other side in order to accommodate variations in equipment layout, etc. (Because the home position is adjusted to the factory default for shipping, when changing home direction after delivery the product may need to be returned to IAI for adjustment.)

Double slider specification

Model **W**

Description This option adds a free slider on the drive belt motor side. Doubling the slider enables increased allowable moment and overhang load length. At shipping, the driven slider and free slider are not coupled. They are to be coupled by the customer for use.

Round cable joint connector with screw locking (EU standard)

Model **EU**

Description Option for a motor/encoder cable with round plastic/metal cable plug with screw locking. Without this option flat plastic plugs are default.

Double Slider Specification

■ Precautions for Double Slider Specification

(1) The dynamic allowable moment and overhang load length change depending on the span between the two sliders.

Dynamic allowable moment direction figure

These values for the dynamic allowable moment are based on the standard rated operation life. Note that use exceeding the moment specification value will shorten the guide life.

Moment direction

Overhang load length figure

Use exceeding the overhang allowable value may lead to vibration, so be sure to use within the allowable values.

Double slider specification figure

Slider coupling part (image)

At shipping, the driven slider and free slider are not coupled. They are to be coupled by the customer for use.

(Note) Be sure to couple the sliders at the slider span specified as of ordering.

(2) Be sure to specify the effective stroke upon ordering.

Example IFA-SA1L-WA-100-1650-T2-M-AQ-W (Effective stroke: 1500mm)

(3) When specifying the double slider specification option, the effective stroke (actually operable stroke) is the length of the nominal stroke (stroke as in the model name) minus [Ⓐ] (slider length + slider cover span). When ordering, select a stroke length including the length plus [Ⓐ] or more as the required stroke. As well, make sure the effective stroke is at least the minimum effective stroke with double slider specification.

$$\text{Nominal stroke} \geq \text{Effective stroke} + \text{Ⓐ}$$

(stroke as in model name) (actually operable stroke)

Example IFA-SA

Effective stroke: 1500mm [Ⓐ]: 150mm (at actual slider span 60mm)

1500mm + 150mm = 1650mm -> Order at 1650mm or above in the model name

	Effective stroke available with double slider specification (mm)	[Ⓐ] Slider length + Slider cover span (mm)
200 ~ 2450 (nominal stroke 350 ~ 2600)	150	
220 ~ 2420 (nominal stroke 400 ~ 2600)	180	
200 ~ 3000 (nominal stroke 400 ~ 3200)	200	
210 ~ 2960 (nominal stroke 450 ~ 3200)	240	

(4) Be sure to confirm the payload with double slider specification in the Table of Payload by Speed/Acceleration (double slider specification) on the product specification pages.

■ Double slider specification table

Model	Dynamic allowable moment						Overhang load length (mm)	Slider mass (kg)	Slider length (mm)	Effective stroke available with double slider specification (mm)	[Ⓐ] Slider length + slider cover span (mm)	
	Standard rated operation life (km)	Slider span (mm)		Ma direction (N-m)	Mb direction (N-m)	Mc direction (N-m)						Ma/Mb/Mc direction
		Actual slider span	Slider cover span									
IFA-SA	10000	Min. 60	2	182	260	125	1200	0.7	148	200 ~ 2450 (nominal stroke 350 ~ 2600)	150	
		Max. 90	32	228	325	125	1350			220 ~ 2420 (nominal stroke 400 ~ 2600)	180	
IFA-MA	10000	Min. 80	10	448	640	307	1600	1.5	190	200 ~ 3000 (nominal stroke 400 ~ 3200)	200	
		Max. 120	50	561	801	307	1800			210 ~ 2960 (nominal stroke 450 ~ 3200)	240	

Duty Ratio

Estimated allowable duty ratio varies depending on operating conditions (payload and acceleration/deceleration). Using the formula below, calculate the load factor LF and acceleration/deceleration time ratio (tod) and find them in the graph.

! Caution: If an overload error occurs, increase the dwell time to lower the duty ratio or decrease the acceleration/deceleration.

[Duty ratio]
The duty ratio is the operating rate shown as the actuator's operating time during one cycle, expressed as a percentage.

$$D = \frac{T_M}{T_M + T_s} \times 100(\%)$$

D: Duty ratio
T_M: Operating time (including push-motion operation)
T_s: Stop time

Calculating the duty ratio

Calculate the load factor and acceleration/deceleration time ratio, and read the duty ratio from the graph. When the load factor is less than 50%, operation with duty ratio of 100% (continuous operation) is possible.

1 Load factor (LF)

The IFA rated acceleration/deceleration is 0.3G. Please refer to the product specification page for the maximum payload at acceleration 0.3G.

When acceleration/deceleration during operation α is below 0.3G

$$\text{Load factor: LF} = \frac{M \times \alpha}{M_r \times 0.3} [\%]$$

Max. payload at rated acceleration : M_r [kg]

Payload during operation : M [kg]

Acceleration/deceleration during operation : α [G]

When acceleration/deceleration during operation α is above 0.3G

$$\text{Load factor: LF} = \frac{M \times \alpha}{M_d \times \alpha} = \frac{M}{M_d} [\%]$$

Command acceleration payload : M_d[kg]

Payload during operation : M [kg]

Acceleration/deceleration during operation : α [G]

2 Acceleration/deceleration time ratio tod

$$\text{Acceleration/deceleration time ratio tod} = \frac{\text{Acceleration time during operation} + \text{deceleration time during operation}}{\text{Operating time}} [\%]$$

$$\text{Acceleration time} = \frac{\text{Speed during operation} [\text{mm/s}]}{\text{Acceleration during operation} [\text{mm/s}^2]} [\text{sec.}]$$

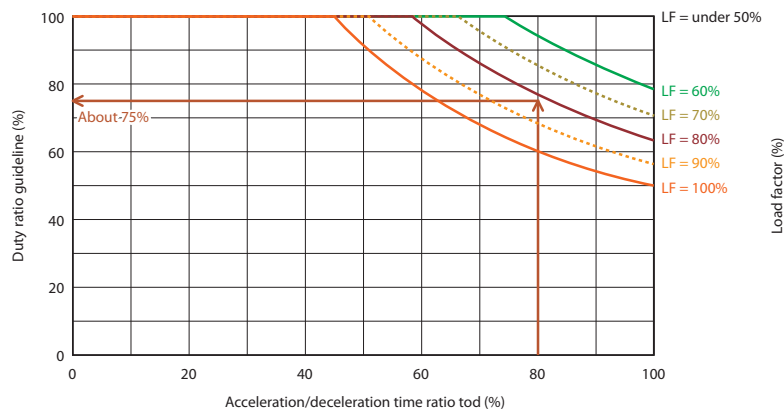

$$\text{Deceleration time} = \frac{\text{Speed during operation} [\text{mm/s}]}{\text{Deceleration during operation} [\text{mm/s}^2]} [\text{sec.}]$$

$$\text{Acceleration} [\text{mm/s}^2] = \text{Acceleration (G)} \times 9800 \text{mm/s}^2$$

$$\text{Deceleration} [\text{mm/s}^2] = \text{Deceleration (G)} \times 9800 \text{mm/s}^2$$

3 From calculated load factor LF and acceleration/deceleration time ratio tod, read the duty ratio

Example: When load factor LF is 80% and acceleration/deceleration time ratio tod is 80%, the duty ratio guideline will be approximately 75%.

■ IFA maintenance part schematics

■ IFA maintenance part model list

The numbers in the table correspond to the numbers in the schematics.

① Motor unit assembly (with pulley)

Type	Motor wattage (W)	Model
SA	100	M-IFA-TMA100-WA-PU
MA	200	M-IFA-TMA200-WA-PU
	400	M-IFA-TMA400-WA-PU

⑤ Slider roller assembly

Type	Model
SA	SR-IFA-SA
MA	SR-IFA-MA

② Timing belt

Type	Model
SA	TB-IFA-SA
MA	TB-IFA-MA

⑥ Actuator cable assembly

Type	Model
SA	CB-IFA-SA-MPA-AS
MA	CB-IFA-MA-MPA-AS

③ Slider belt/drive belt

Type	Model
SA	LB-IFA-SA-○○○
MA	LB-IFA-MA-○○○

*○○○ indicates the stroke.

⑦ Driven pulley assembly

Type	Model
SA	PLY-IFA-SA
MA	PLY-IFA-MA

④ Stainless steel sheet

Type	Model	
	Single slider	Double-slider
SA	ST-IFA-SA-○○○	ST-IFA-SAD-○○○
MA	ST-IFA-MA-○○○	ST-IFA-MAD-○○○

*○○○ indicates the stroke in the model name.

Please refer to the IAI general catalogue extract, volume controller, for more information on controllers and options.

Single-axis controller

When controlling one axis with one controller

Supported control method
PIO (I/O)
Pulse-train
Field network
Serial communication (Modbus)

SCON

Pulse output is available for SCON. Convenient for linkage with related control devices.

(Inquire with IAI when using both field network control and pulse output)

- Low price
- The same control mode as the solenoid valve can be selected
- No dedicated controller program required

230v AC servo motor

Multi-axis controller

When controlling multiple axes with one controller

Supported control method
SEL language (IAI dedicated program)
PIO (I/O)
Field network

RCON

24v Pulse motor, 24v AC servo motor, 24v DC brushless motor, 230v AC servo motor

- Compact
- Low price
- Up to 16 connectable axes (some restrictions apply depending on operation mode)

RSEL

24v Pulse motor, 24v AC servo motor, 24v DC brushless motor, 230v AC servo motor

- Compact
- Low price
- Up to 8 connectable axes

SSEL

230v AC servo motor

- 2-axis synchronous control possible

XSEL

230v AC servo motor

- 2-axis synchronous control possible
- Interpolation with up to 8 axes possible

Use when conducting interpolation operation.

PC teaching software

Two types of software are available for setting position and parameters.

RCM-101-□

Supports controllers with "□CON" in the model name

IA-101-□

Supports controllers with "□SEL" in the model name

Teaching pendant

TB-02

TB-03

- Full-color touch panel equipped
- Enables position registration and test runs as well as error troubleshooting and maintenance part list confirmation

When placing an order for a replacement cable after purchasing a product, use the model name shown below.

Table of compatible cables

*Indicate the cable length (L) in □□□, maximum 30m
E.g.) 080 = 8m

	Motor robot cable		Encoder robot cable
	SCON/SSEL/XSEL	RCON/RSEL	Common to all controllers
IFA standard	CB-X-MA□□□□ / CB-XEU-MA□□□□	CB-X2-MA□□□□ / CB-XEU1-MA□□□□	CB-X1-PA□□□□ / CB-XEU1-PA□□□□
IFA with LS			CB-X1-PLA□□□□ / CB-XEU1-PLA□□□□

Model Name: **CB-X-MA□□□□ / CB-XEU-MA□□□□**

(Fig.: Motor robot cable CB-X-MA□□□□ with plastic connector)

Minimum bending R: r = 51 mm or more (for movable use)

Wire	Color	Signal	No.	No.	Signal	Color	Wire
